📍 Galle, Sri Lanka.

PROFILE

Detail-oriented Computing and Information Systems graduate with hands-on QA experience gained through an industry internship and independent testing projects. Skilled in manual and basic automated testing, test case design, defect identification and tracking, and regression testing, with working knowledge of the software development lifecycle (SDLC). Experienced with Selenium for test automation and Postman for API validation, currently expanding automation skills with Playwright. Strong analytical mindset, attention to detail, and a collaborative approach to working with development teams to deliver reliable software.

PROFESSIONAL EXPERIENCE

CodeRay Technologies, Software Engineer (QA) Intern 09/2024 – 03/2025 | Badulla, Sri Lanka

- Designed and executed manual test cases for web applications, verifying functionality against requirements.
- Performed functional and regression testing to confirm application quality across releases.
- Identified, documented, and tracked defects to resolution, collaborating with developers to verify fixes.
- Validated REST APIs using Postman, ensuring endpoint reliability and data accuracy.
- Prepared test cases, bug reports, and feature documentation to support QA and development teams.
- Participated in Agile sprint planning and daily stand-ups, contributing to sprint-level quality goals.
- Gained cross-functional exposure to Laravel and Flutter development, strengthening understanding of end-to-end SDLC workflows.

PROJECTS

E-commerce Website 🏠, Individual 2024

- Designed and executed manual test cases covering functional, regression, and boundary testing across core e-commerce workflows.
- Automated key user flows (login, product search, checkout) using Selenium, reducing repetitive manual testing effort.
- Identified and tracked defects through the full lifecycle, from discovery through verification and closure.
- Produced test execution and bug reports with clear traceability between test cases and identified issues.

Medical Records Management System 🏥, Group 2023 – 2024

- Tested REST APIs and validated business rules using Postman.
- Participated in requirement analysis, translating specifications into testable application features.
- Collaborated across Agile development cycles with cross-functional team members.

EDUCATION

Sabaragamuwa University of Sri Lanka, BSc (Hons) in Computing and Information Systems 2021 – 2026

Sangamitta Balika Vidyalyaya, GCE Advanced Level in Physical Sciences Stream 2019 | Galle

TECHNICAL SKILLS

Programming Languages — Java Basic | JavaScript | Node.js

Frameworks and Libraries — Express.js | Tailwind CSS | React JS

Technologies and Tools — Selenium | Playwright (learning) | Postman | Git | GitHub | ClickUp | VS Code

Testing Skills — Manual Testing | Functional Testing | Regression Testing | Smoke Testing | Integration Testing | API Testing | Test Case Design | Test Scenario Writing | Defect Identification & Tracking | Bug Reporting | STLC | SDLC

SOFT SKILLS

- Attention to Detail
- Problem Solving
- Team Collaboration
- Analytical Thinking
- Communication & Interpersonal Skills
- Time Management
